DETAILED ACTION

This is in response to 04/16/04.

1. Information Disclosure Statement

The information disclosure statement (IDS) submitted on 04/16/04 was filed after the mailing date of the application on 11/02/01. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

2. Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6, 8, 18-25 and 27 are rejected under 35 U.S.C. 102(e) as being anticipated by David Grawrock "TCPA TPMPP" version 0.45, sep 14, 2000.

Regarding claims 1 and 18, Grawrock discloses: In a data processing system, a method comprising the steps of creating a migratable storage tree with a storage root key (the tree a storage entity in migratable, page 18, Grawrock); and creating a non-migratable storage tree with the storage root key (the tree a storage entity in non-migratable, page 18, Grawrock),

wherein the migratable storage tree and the non-migratable storage tree are identically structured with corresponding keys and authentication data (TCPA security policy, page 18, Grawrock).

Regarding claims 2 and 19, all the limitations of these claims have been noted in the rejection of claims 1 and 18. In addition, Grawrock discloses: wherein the migratable storage tree and the no migratable storage tree are created by a trusted computing module in accordance with Trusted Computing Platform Alliance (TCPA, page 18, Grawrock).

Regarding claims 3 and 20, all the limitations of these claims have been noted in the rejection of claims 1 and 18. In addition, Grawrock discloses: wherein the migratable storage tree comprises migratable keys and a user key, wherein the non-migratable storage tree comprises non-migratable keys and a user key (page 19-20, Grawrock).

Regarding claims 4 and 22, all the limitations of these claims have been noted in the rejection of claims 1 and 18. In addition, Grawrock discloses: wherein the non-migratable storage tree will include non-migratable storage keys corresponding to each migratable storage key in the migratable storage tree (page 26, Grawrock).

Regarding claims 5 and 24, all the limitations of these claims have been noted in the rejection of claims 1 and 18. In addition, Grawrock discloses: wherein use authorization in the non-migratable storage tree will be identical to use authorization in the migratable storage tree (page 16, Grawrock).

Regarding claim 6, all the limitations of this claim have been noted in the rejection of claim 1. In addition, Grawrock discloses: further comprising the steps of requesting a migratable storage key; and requesting a non-migratable storage key (page 18, Grawrock).

Regarding claim 21, all the limitations of this claim have been noted in the rejection of claim 18 above. In addition, Grawrock discloses: wherein the migratable storage tree comprises migratable keys and encrypted user data wherein the non-migratable storage tree comprises non-migratable keys and encrypted user data (page 19-20, Grawrock).

Regarding claim 23, all the limitations of this claim have been noted in the rejection of claim 18 above. In addition, Grawrock discloses: wherein the non migratable storage tree will include non-migratable storage keys corresponding to a subset of the migratable storage keys in the migratable storage tree (5.1.0.8, page 28, Grawrock).

Regarding claim 25, all the limitations of this claim have been noted in the rejection of claim 18 above. In addition, Grawrock discloses: wherein use authorization in the non-migratable storage tree can be deduced from user authorization in the migratable storage tree with additional data (page 30-32, Grawrock).

Regarding claim 27, all the limitations of this claim have been noted in the rejection of claim 18 above. In addition, Grawrock discloses: wherein a migratable key can be transferred to other trusted platform module chips and wherein a non-migratable key cannot be transferred to other trusted platform module chips (page 35-36, Grawrock)

4. Allowable Subject Matter

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record and that encountered while searching for the claimed invention fails to anticipate and/or suggest: in a data processing system, a method comprising wherein the step of requesting a non-migratable storage key will identify a parent key

Art Unit: 2171

in the non-migratable storage tree that corresponds to the parent key in the migratable storage tree.

Claims 9-17 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record and that encountered while searching for the claimed invention fails to anticipate and/or suggest: in a data processing system, a method comprising the steps of wherein the second command requests creating a non-migratable storage key with the given authentication data and a second parent key which is determined from looking up a key that corresponds to the first parent key in a database as recited in claim 9.

Regarding claims 10-17, these claims depend from claim 9 and are therefore allowable.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record and that encountered while searching for the claimed invention fails to anticipate and/or suggest: in a data processing system, a method comprising wherein the use authorization in the non-migratable storage tree is obtained by hashing the concatenation of the user authorization in the migratable storage tree with a fixed string as recited in claim 26.

5. Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
